Learning Outcomes

On completion of this course, learners will be able to:

- LO1: Enable Copilot in Power Apps and navigate Power Apps Studio ready to build.
- LO2: Prepare a Dataverse table with clear names and descriptions so Copilot can build accurate apps.
- LO3: Write effective prompts that get Copilot to build the app you actually want.
- LO4: Create a working canvas app from a single plain-language prompt.
- LO5: Refine an app's screens, controls and layouts by describing the changes to Copilot.
- LO6: Generate and explain Power Fx formulas with Copilot, and verify them against your data.
- LO7: Add an in-app Copilot chat so end users can query the app's data in natural language.
- LO8: Build a Power Automate flow with Copilot and call it from a canvas app.
- LO9: Automate approval and notification scenarios with Copilot-built flows.
- LO10: Share and govern AI-assisted apps responsibly.

Learning Reinforcement

- Every topic is followed by hands-on labs that learners complete on their own machine.
- Each lab ends with a 'Test it' verification step so learners can confirm their own progress.
- The trainer circulates during lab time to give individual feedback and unblock learners.
- Each topic closes with a recap mapped back to the course learning outcomes.
